

AUSTRALIAN RAIL TRACK CORPORATION LTD  
**Southern Sydney Freight Line**

**IMPORTANT COMMUNITY INFORMATION  
WORK COMMENCES AT CARRAMAR STATION**

Australian Rail Track Corporation (ARTC) will be commencing work on an extension to the existing pedestrian underpass at Carramar Station shortly. The work will not affect the actual Carramar Station.

Please be aware that there will be a presence of construction workers and building equipment at Carramar Station. We apologise for any inconvenience caused during the execution of this work. Completion of this work will increase the safety, comfort and accessibility at the station. This upgrade will greatly benefit the local community and make it easier for families and seniors to use public transport.

The access to the underpass will be maintained, during the work the underpass will be closed off half by half. Only at very limited occasions the access through the underpass be closed during rail shutdown times. Commuters will be clearly notified about these closing times.

These works form part of the construction of the Southern Sydney Freight Line (SSFL), an initiative by ARTC to improve the efficiency and competitiveness of rail freight services. This will increase the use of rail for freight and is better for the environment as rail services have less impact than trucks. The SSFL is a 36 kilometre dedicated freight line between Macarthur and Sefton and the new track is within the existing rail corridor. The SSFL will allow passenger and freight services to operate independently, freeing up passenger lines for improved services.

We appreciate everyone's patience and understanding while we build this important project.
