

AUSTRALIAN RAIL TRACK CORPORATION LTD

## Southern Sydney Freight Line

### IMPORTANT COMMUNITY INFORMATION Cabramatta Station – Tree Removal

Australian Rail Track Corporation (ARTC) has begun works at Cabramatta Station. This work is required as part of the Cabramatta Station upgrade works and will involve construction of a new bus stop, lift shaft and concourse.

The design upgrade for Cabramatta Train Station identifies new 90 degree parking along Railway Parade south of Cabramatta Road East. Along with these works existing trees have been identified for removal.

The works in this area are identified as follows:

- Demolition of the existing kerb and gutter,
- Extending the asphalt road surface approx. 3m toward the railway boundary fence,
- Excavation of approximately 300mm of topsoil within the existing road verge to accommodate the new perpendicular parking bays at road level, and
- Installation of a new pedestrian path linking parking bays with the train station.

A replacement strategy has been agreed and trees will be replaced towards the end of the project, the replacement strategy is to be agreed with Fairfield City Council. The removal of these trees will begin on the 30<sup>th</sup> November 2009 and will take approximately one week.

We appreciate everyone's patience while we build this important project.
