Telstra Connection – Minto Station

Australian Rail Track Corporation (ARTC) will be undertaking work at Minto Station to install a new Telstra connection into Minto Station. The works will begin on 22nd February 2010 and will continue in this location for approximately 4 weeks. This will replace the existing Telstra connection that is in the way of the new Southern Sydney Freight Line. The works include an underbore beneath Somerset Road as well as local excavation and trenching to connect to the existing Telstra network.

This relocation is required as part of the enabling works to facilitate the construction of the Southern Sydney Freight Line. The equipment on site will include a boring machine, excavator, jack hammer, concrete mixer, works vehicles and hand tools.

As a result of the works changed traffic arrangements will be in place. Traffic will be reduced to one lane, but will remain two way and will be managed by traffic controllers with stop/go arrangements in place. Some traffic delays should be expected.

We appreciate everyone's patience while we build this important project for Sydney, NSW and the nation.
