

AUSTRALIAN RAIL TRACK CORPORATION LTD

Southern Sydney Freight Line

IMPORTANT COMMUNITY INFORMATION

Works Recommencing – Bankstown Area

Australian Rail Track Corporation (ARTC) will be recommencing construction works between Enfield West and Leightonfield in the next two weeks. These works form part of the construction of the Southern Sydney Freight Line (SSFL), an initiative by ARTC to improve the efficiency and competitiveness of rail freight services. This will increase the use of rail for freight and is better for the environment as rail services have less impact than trucks. The SSFL is a 36 kilometre dedicated freight line between Macarthur and Enfield West and the new track is within the existing rail corridor. The SSFL will allow passenger and freight services to operate independently, freeing up passenger lines for improved services.

Enabling works will begin almost immediately with construction works to follow soon after. The works will be inside the corridor with some works outside of the corridor where we are relocating services or working on roads/bridge in close proximity to the rail way line. Where there is a direct impact on a road with closure or traffic control we will provide notification to the area impacted in accordance with council requirements.

We apologise for any inconvenience caused during the execution of this work. We appreciate everyone's patience while we build this important project for Sydney, NSW and the nation.
