

AUSTRALIAN RAIL TRACK CORPORATION LTD

Southern Sydney Freight Line IMPORTANT COMMUNITY INFORMATION

Riverpark Drive viaduct works, Liverpool

Australian Rail Track Corporation (ARTC) will be constructing a viaduct (overhead bridge) within the rail corridor adjacent to Riverpark Drive, Liverpool.

Before work starts on the viaduct, a re-alignment of the road space in Riverpark Drive will be made, so that traffic and pedestrians will be provided a safe temporary access along Riverpark Drive, connecting to the new pedestrian pathway in Lighthorse Park. These pedestrian works will start on Monday 15 August 2011, followed by the viaduct works.

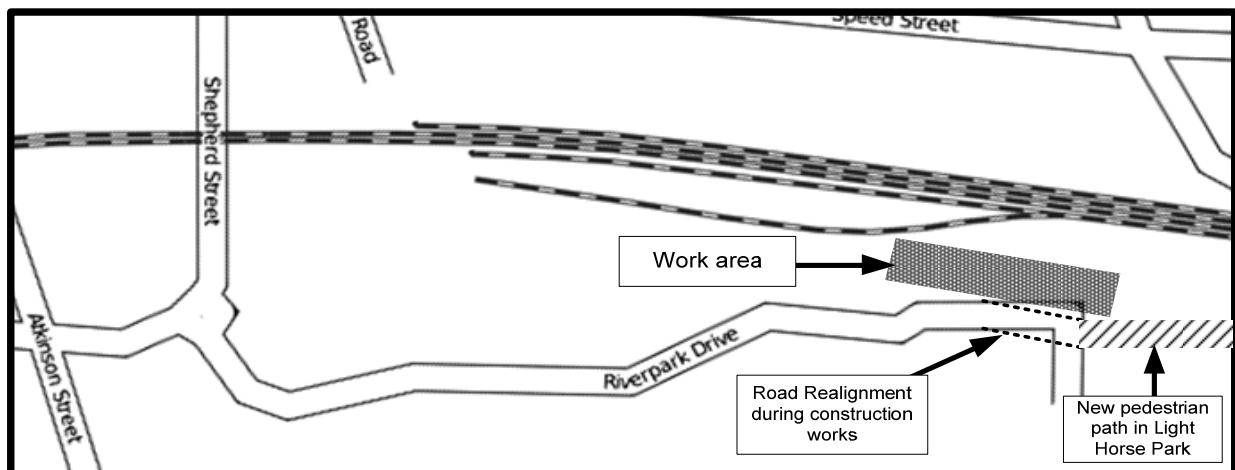

The viaduct works will include an activity called 'driven piling', which requires large machinery (piling rig) to drive down piles located within the rail corridor into the ground.

This noisy activity will only be undertaken on Monday to Fridays from 9am to 12noon and from 2pm to 5pm and on Saturday mornings from 9am to 12noon. The duration of this driven piling activity is expected to take just over a month, weather permitting.

ARTC will undertake noise and vibration monitoring in surrounding areas at the commencement of the works.

At the end of the construction work noise walls will be erected along Riverpark Drive.

It is expected that the duration of all the combined works will take approximately five months.

We appreciate your patience while we build this important project for Sydney and NSW.
